understanding of how building envelopes perform and operate as well as striving for a high level of data transparency. It is hoped that projects like this will give others the information needed to undertake similar installations. By utilizing the Web and presenting data in an interesting and graphically clear manner, it is hoped that it will lead to a host of new and exciting educational outcomes.

ACKNOWLEDGEMENTS

We would like to thank the following individuals; John Kane, Tom Reilly and Johanna Collins from Architekton; Patrick Magness and Mike Stanley from Gensler; and Bill Okland, Tim Goyette and Ryan Johnson from Okland Construction. Without their help this project would not have been completed. We also want to thank, ASU representatives like Morgan Olsen, John Riley, Edd Gibson, Ed Soltero, Patti Olson, Art Lara and Robert Vandling who provided valuable assistance throughout this project. Finally we would like to thank all the subcontractors, manufacturers and tradesmen who worked on the CAC for their time, donations of equipment, support and guidance.
